## Ipsidy Announces the Launch of Access™ Mobile Biometric Perimeter Protection

August 13, 2018

LONG BEACH, NY, August 13, 2018. – Ipsidy Inc. (authid.ai) [OTCQX:IDTY], a provider of secure, biometric identification, identity management and electronic transaction processing services, today announced the launch of Access™, its out-of-the-box, mobile, biometric identity access management solution.

Access helps protect any perimeter and create a safe environment by monitoring the enrolled identities of people moving in, out, and around any defined area. Enrolled participants whether residents, employees, visitors, customers, students or patients, use Ipsidy's mobile-identity application to provide quick and secure biometric identification at their arrival and exit.

Ipsidy's tablet-based Concierge application is used by the site's attendant to provide real-time monitoring of enrolled participants' entry and exit transactions. The Concierge app provides the tools to register and verify users' identities while also furnishing reporting and analytics. Administrators can track employee attendance by reviewing access logs. Receptionists, doorman and security guards can greet visitors by name, providing a more personalized experience.

Access can be deployed across a range of environments, including commercial & residential buildings, school and hospital campuses, logistics and warehouse centers and even 'pop-up' security perimeters. Access offers customizable workflows that can be used to meet a site's unique business and operational requirements. For example, from the convenience of their mobile phone, a site's employees and residents can create date and time specific [digital visitor passes](#) that use identities authenticated by the visitor and subsequently monitored by the attendant. An Access authenticated identity can also be used to authorize entry at subsequent access points or transactions without any additional user action, thus providing a more streamlined and frictionless experience.

Experience the flexibility and security of Access by upgrading from your legacy system to a solution that can be used from the palm of your hand. See how easily Access allows you to create new workflows using nothing more than a tablet, Bluetooth beacons and a participant's mobile phone. Pricing for Access is based on the number of users and starts at only a few hundred dollars a month.

Learn more and schedule an Access demo by visiting <https://authid.ai/solutions/access>. Download the Ipsidy mobile app on the [App Store](#) or [Google Play](#) to your mobile phone. System integrators and other commercial and residential building management service providers should contact us to learn more about our reseller programs.

### About Ipsidy®

Ipsidy Inc (OTCQX:IDTY) authid.ai (formerly known as ID Global Solutions Corporation OTC:IDGS) is a provider of secure, biometric identification, identity management and electronic transaction processing services. Ipsidy is headquartered in New York and has operating subsidiaries: MultiPay in Colombia, [www.multipay.com.co](http://www.multipay.com.co); Cards Plus in South Africa, [www.cardsplus.co.za](http://www.cardsplus.co.za); and Ipsidy Enterprises in the U.K. Our identity transaction platform creates a trusted transaction, embedding authenticated identity and event details with a digital signature and using a participant's mobile device to approve everyday transactions. Our platform offers biometric and multi-factor identity management solutions which support a wide variety of electronic transactions. We believe that it is essential that businesses and consumers know who is on the other side of an electronic transaction and have an audit trail, proving that the identity of the other party was duly authenticated. We continue to enhance our solutions to provide our customers with the next level of transaction security, control and certainty over everyday transactions. Further information on Ipsidy can be found at [authid.ai](http://authid.ai) or contact us at [sales@ipsidystaging.wpengine.com](mailto:sales@ipsidystaging.wpengine.com).
